TABLE OF CONTENTS OF "INTERIOR BALLISTICS"  
BY M. YE. SEREBRYAKOV

This book, written by Professor M. Ye. Serebryakov, Doctor of Technical Sciences, a member of the Academy of Artillery Sciences, presents the theoretical fundamentals of interior ballistics and contemporary methods for the solution of its chief problems. Numerous experimental data, examples, and problems are given for facilitating the study of methods for fundamental ballistics calculations.

## Table of Contents

## INTRODUCTION.

Subject and Problems of Interior Ballistics	7
Subdivisions of Interior Ballistics	11
Significance of Interior Ballistics in Designing an Ordnance System	12
History of Interior Ballistics	12
List of Terms, Symbols, and Definitions in Interior Ballistics	24

## PART I. PHYSICAL FUNDAMENTALS OF INTERIOR BALLISTICS

## Section I. Powder as a Source of Energy

1. General Information on Powders	31
2. Basic Characteristics of Powder	34

## Section II. General Pyrostatics

- |   |     |
|---|-----|
| 1. Burning of Powders   | 43  |
| 2. Characteristic Equation of Powder Gases                      | 56  |
| 3. Heat Losses to Walls When Burning Powder in a Closed Chamber | 73  |
| 4. Law of Gas Formation   | 80  |
| 5. Law of Burning Rate  | 105 |
| 6. Change in Pressure as a Function of Time                     | 113 |

## Section III. Ballistic Analysis of Powders on the Basis of the Physical Law of Burning

- |  |     |
|--|-----|
| 1. Development of Method for Ballistic Analysis of Powders | 119 |
| 2. Ballistic Analysis of Actual Burning of Powder          | 129 |
| 3. Burning of Perforated Powders                           | 143 |
| 4. Application of Integral Diagrams                        | 158 |

## Section IV. Physical Fundamentals of Pyrodynamics

- |  |     |
|--|-----|
| 1. Phenomenon of Firing and Fundamental Relations            | 172 |
| 2. Balance of Energy on Firing                               | 177 |
| 3. Investigation of Fundamental Relations                    | 183 |
| 4. Forces Originated in Motion of a Projectile Along Rifling | 198 |
| 5. Deduction of Formulas for Secondary Work                  | 210 |
| 6. Additional Problems                                       | 218 |

## Section V. Phenomena Related to Gas Outflow

- |  |     |
|--|-----|
| General Considerations                                 | 228 |
| 1. General Information From Gas Dynamics               | 229 |
| 2. Application of Fundamental Formulas of Gas Outflow  | 241 |
| 3. Burning of Powder in an Incompletely Closed Chamber | 251 |
| 4. Brief Theory of Muzzle Brakes                       | 264 |

PART 2. THEORY AND PRACTICE OF SOLUTION  
OF INTERIOR BALLISTICS PROBLEMS

<u>Introduction</u>	273
Section VI. Analytical Methods for Solution of Direct Problem of Interior Ballistics	
Fundamental Assumptions	278
1. Solution of Fundamental Problem Under Forcing Pressure and the Geometrical Law of Burning	279
2. Precise Method Developed by Professor N. F. Drozdov	306
3. Solution of Problems of Interior Ballistics for Simplest Cases	324
4. Investigation of Fundamental Relations for the Simplest Case ( $X = 1, \psi = 0, \alpha = \frac{1}{\delta}$ )	333
5. Conception of Other Methods of Solution	343
6. Solution of the Fundamental Problem of Interior Ballistics on Basis of Physical Law of Burning	347
Section VII. Numerical Methods of Solution	
Application of Numerical Analysis in Interior Ballistics	360
1. Numerical Integration by Finite Differences	361
2. Solution by Expansion in a Taylor's Series	392
Section VIII. Empirical Methods of Solution	
1. Monomial and Differential Formulas	402
2. Empirical Formulas and Tables	408
Section IX. Tabular Methods for Solution of the Problem in Interior Ballistics	
1. Significance of Tabular Methods of Solution for Artillery Practice	417
2. Tables for Determination of Fundamental Elements of Firing	423
3. Detailed Tables for Plotting Curves for Pressure and Velocities	432
4. Tables Based on Generalized Formulas With a Decreased Number of Parameters and With Relative Derivatives	439
5. Basic Information From the Theory of Similarity	446
Section X. Ballistic Design of Guns	
General Considerations	450
1. Initial Data	454

- |   |     |
|---|-----|
| 2. Theoretical Fundamentals of Ballistic Designing          | 463 |
| 3. Application of Relations Obtained to Practical Designing | 483 |
| 4. Additional Information                                   | 500 |

PART 3. SOLUTION OF PROBLEMS  
OF INTERIOR BALLISTICS IN COMPLICATED CASES

Section XI. Complicated Cases

- |   |     |
|---|-----|
| 1. Solution for Case of Combined Charges  | 517 |
| 2. Solution Considering Gradual Cutting of a Rotating Band Into Rifling of a Bore | 537 |
| 3. Solution of Interior Ballistics Problem for Trench Mortars                     | 547 |

Section XII. Guns With Conical Bore

- |   |     |
|---|-----|
| 1. Basic Features and Ballistic Properties of Barrels With Conical Bore | 570 |
| 2. Method for Solution of Interior Ballistics Problem                   | 593 |
| 3. Ballistic Design of Conical Barrels                                  | 601 |

APPENDIX

- |   |     |
|---|-----|
| 1. Tables for Determining Burned Portion of a Charge When Powder Burns at Constant Volume | 607 |
| 2. Tables of Professor N. F. Drozdov  | 634 |
| 3. Tables of M. S. Gorokhov   | 658 |
| 4. Tables of Function $\int_0^{\rho} z_{\beta}^{\beta} d\rho$                             | 660 |
| 5. Reference Literature   | 666 |
